## Professional Summary

---

Professional Software Test Engineer with 15 months of hands-on experience in manual and automation testing across Android, iOS, web, and gaming applications. Skilled in Selenium (Java), API testing (Postman), Basic SQL and JIRA for bug tracking and test management. Passionate about enhancing software quality through effective testing strategies, detailed bug reporting, and seamless collaboration with development teams.

## Skills & Tools

---

- **Testing Types:** Manual Testing, Automation Testing, Functional Testing, Regression Testing, API Testing, Mobile Testing.
- **Test Management & Bug Tracking:** JIRA, TestRail, Bugzilla.
- **Automation Tools & Frameworks:** Selenium WebDriver, Eclipse, TestNG, JMeter, SQL.
- **API Testing:** Postman, Rest Assured.

## Education

---

**Mekapati Rajamohan Reddy institute of Technology & Science**

*Btech - Civil Engineer*

*June 2019 – May*

*2023*

– GPA: 7.0/10

## Experience

---

**Software Test Engineer**

*Dec 2023 – Present*

*TECH4BILLION MEDIA PVT LTD (CHINGARI)*

- Designed and executed **test cases, automation scripts, and frameworks** using **Selenium & TestNG**.
- Performed **manual and automation testing** for Android, iOS, web applications, and gaming platforms.
- Verified audio/video quality, latency, and user experience across different network conditions.
- Expert in Identifying and Reporting Critical Bugs
- Efficient in Bug Reporting and Communication with Developers
- Report bugs in **simple and easy-to-understand language** to help developers quickly understand the issue.
- Provide **step-by-step reproduction**, expected vs actual results, and screenshots/logs for better clarity.
- Conducted **API testing** using Postman to validate REST API functionality and response accuracy.
- Executed **regression testing** to identify defects and ensure software stability before releases.
- Collaborated with developers and product teams, using **JIRA** for effective bug tracking and reporting.
- Experienced in Analyzing Mobile Network Logs for Debugging Issues
- Experienced in Event Testing to Validate User Interactions and App Analytics
- Compare app designs with **Figma prototypes** to ensure consistency in layout, colors, fonts, and spacing.
- Test navigation flow, responsiveness, and usability to ensure a smooth and intuitive user journey.
- Expert in Security Testing for Blockchain Applications
- Identify application weaknesses by testing invalid inputs, edge cases, and unexpected user behaviors.

## Certifications

---

May 2023 – Dec  
2003

### *Q-Spiders (Hebbal)*

- Certified in Software Testing (Manual & Automation) from QSpiders.
- Certification in Selenium Automation Testing, covering TestNG, Java, and WebDriver framework.
- Certified in API Testing using Postman and Rest Assured for validating RESTful services.
- Hands-on certification in SDLC, STLC, and Agile Testing methodologies.

## Languages

---

- English
- Telugu
- Hindi

## Additional Information

---

- **Availability:** Immediate Joiner
- **Sports & Hobbies:** Cricket, Badminton , Table Tennis and Watching Movies & Web Series
